

June was a great month for safetxt with 42 participants recruited.

Site set up is continuing well with Stoke on Trent and Staffordshire Partnership; Chelsea & Westminster; West Middlesex and Berkshire Healthcare trusts all being initiated in June.

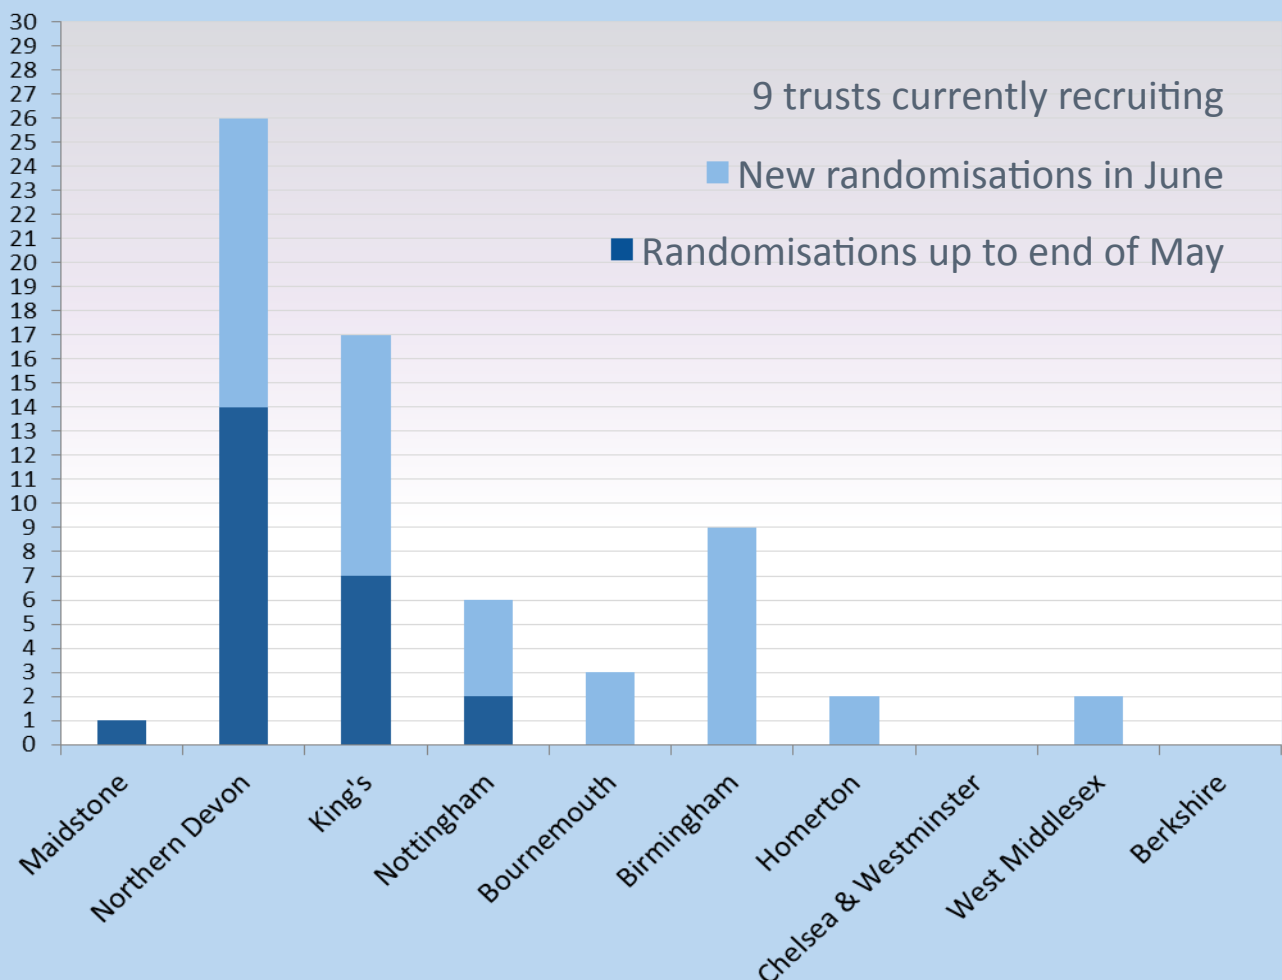

Congratulations go to the teams in Birmingham, Homerton and West Middlesex who all recruited their first participants this month.

As you are all aware, the follow of safetxt participants will be challenging for the team at the CTU. Please remember to stress the importance of this when recruiting participants to the study. There will be a monthly review of completed follow up and feedback will be given to sites if there are any particular issues.

If you have any suggestions for future newsletters please get in touch via safetxt@LSHTM.ac.uk.

Recruitment update

Amendment 3

On the 15th June, amendment 3 for safetxt was approved. This amendment includes changes to the information sheet and consent form to update the information provided and make it easier to understand for the participants.

Current versions:

- **Baseline questionnaire V4 23rd May 2016**
- **Consent form V5 23rd May 2016**
- **Participant information sheet V5 23rd May 2016**
- **Participant introduction card V1 23rd May 2016**

Localised versions of these documents have been emailed to all open sites. Open sites have also been posted printed copies along with a version control document. Please destroy all old versions and return the completed version control document to the CTU.

All sites still in set up will have received generic versions. If you would like help with localising these, please get in touch.

Follow up documents have also been approved for use at the CTU but are not required for use at site.

BASHH Conference

Several members of our team will be attending the BASHH conference on 12th July in Oxford. Our Chief Investigator, Caroline Free is presenting a poster and we will be looking to raise awareness of the trial and to recruit potential new sites.

If you are attending, we will be around the whole day so do look out for us.

safetxt staff profiles: Kim Potter

Hi all, my name is Kim. I recently joined LSHTM to work as a Trials Assistant for the safetxt trial. I will be involved in managing the follow up stages of the trial. Before this I worked at the Royal London Hospital in their very busy Trauma department. When I am not in work I enjoy travelling, running and cooking.
